

SAMPLE DIVIDER | RIFFLE DIVIDER 13100

Purpose:

The riffle splitter is a static and fractional sub-sampling device that can be used for dividing a lot of dry particulate material to be analyzed into two equal parts homogeneously.

Technical Specifications :

- Benchtop type.
- The sample to be analyzed is poured into the hinged container from the upper side of the device so the sample is mixed thoroughly by passing through separates, and the sample is divided into two homogeny samples.
- The sample divided into two are collected in two separate collection containers.
- Very close results are taken from the parallel (double) analyses made for these samples.
- Made of stainless steel and anti-corrosion warranty.
- It has a very economic price.
